Defining Room, Sequence, & Iteration

Room/ Area: Globals (for all included in this "group") are the same. If globals are different then new room assigned.

Ex: A Kitchen
B Island
C Bath
D Laundry

Sequence: Group of work to be done.

Typical:
Ex: A1 Kitchen
B1 Island
C1 Bath

Exception:
Ex: A set broken down by:
A1 Kitchen_ Cabinet Parts
A2 Kitchen_Door/ Drawers
B1 Island

Iteration: The "run number" of that group, with those specific globals.

Ex: A1.01_Kitchen (initial run)
A1.02_Rework (within production process)
A1.03_Warranty (after delivery)

Note: Add-ons (technically) should be a new sequence, but may be added as an iteration to better track the "Group."

A1.01

Room   Sequence   Iteration
